

Info

x means destination register, sr means source register in a register–register operand, pr means register in a register–pointer operand. n means constant number, nb means constant byte number. * means pointer.

For arguments, R means register, Rax means any ax register (ax, eax, rax), K means a constant of any size, KB means a constant where $0 \leq K \leq 127$, P means memory address.

Destination Registers (x)

ax \rightarrow 0

bx \rightarrow 3

cx \rightarrow 1

dx \rightarrow 2

di \rightarrow 7

Source Registers (sr)

ax \rightarrow Cx

bx \rightarrow D(x+8)

cx \rightarrow C(x+8)

dx \rightarrow Dx

di \rightarrow F(x+8)

Register in a Register–Pointer Op (pr)

ax \rightarrow 04

bx \rightarrow 1C

cx \rightarrow 0C

dx \rightarrow 14

di \rightarrow 3C

Size

Goes before every opcode.

word \rightarrow 66

dword \rightarrow [none]

qword \rightarrow 48

1 mov

1.1 mov

1.1.1 register

```
mov R R ⇒ 89 sr
mov R K ⇒ C7 Cx n
mov R P ⇒ 8B pr 25 *
```

1.1.2 pointer

```
mov P R ⇒ 89 pr 25 *
mov P K ⇒ C7 04 25 * n
```

1.2 movsx

```
movsx R byte P ⇒ 0F BE pr 25 *
movsx R word P ⇒ 0F BF pr 25 *
movsxd R P ⇒ 63 pr 25 *
```

1.3 movzx

```
movzx R byte P ⇒ 0F B6 pr 25 *
movzx R word P ⇒ 0F B7 pr 25 *
```

1.4 cmov

```
cmovz R R ⇒ 0F 44 sr
cmovs R R ⇒ 0F 48 sr
```

2 arithmetic

2.1 add

2.1.1 register

```
add R R ⇒ 01 sr
add R KB ⇒ 83 Cx nb
add Rax K ⇒ 05 n
add R K ⇒ 81 Cx n
add R P ⇒ 01 pr 25 *
```

2.1.2 pointer

```
add P R ⇒ 03 pr 25 *
add P KB ⇒ 83 04 25 * nb
add P K ⇒ 81 04 25 * n
```

2.2 sub

2.2.1 register

```
sub R S  $\Rightarrow$  29 sr
sub R KB  $\Rightarrow$  83 C(x+8) nb
sub rax K  $\Rightarrow$  2D n
sub R K  $\Rightarrow$  81 E(x+8) n
sub R P  $\Rightarrow$  29 pr 25 *
```

2.2.2 pointer

```
sub P R  $\Rightarrow$  2B pr 25 *
sub P KB  $\Rightarrow$  83 2C 25 * nb
sub P K  $\Rightarrow$  81 2C 25 * nb
```

2.3 mul

```
mul R  $\Rightarrow$  F7 Ex
mul P  $\Rightarrow$  F7 24 25 *
```

2.4 imul

```
imul R  $\Rightarrow$  F7 E(x+8)
imul P  $\Rightarrow$  F7 2C 25 *
imul R R  $\Rightarrow$  0F AF sr
```

2.5 div

```
div R  $\Rightarrow$  F7 Fx
div P  $\Rightarrow$  F7 34 25 *
```

2.6 idiv

```
idiv R  $\Rightarrow$  F7 F(x+8)
idiv P  $\Rightarrow$  F7 3C 25 *
```

2.7 neg

```
neg R  $\Rightarrow$  F7 D(x+8)
neg P  $\Rightarrow$  F7 1C 25 *
```

3 Shift

3.1 shr

```
shr R 1  $\Rightarrow$  D1 E(x+8)
shr R KB  $\Rightarrow$  C1 E(x+8) nb
shr P 1  $\Rightarrow$  D1 2C 25 *
shr P KB  $\Rightarrow$  C1 2C 25 * nb
```

3.2 sar

```
sar R 1  $\Rightarrow$  D1 F(x+8)
sar R KB  $\Rightarrow$  C1 F(x+8) nb
sar P 1  $\Rightarrow$  D1 3C 25 *
sar P KB  $\Rightarrow$  C1 3C 25 * nb
```

3.3 shl

```
shl R 1  $\Rightarrow$  D1 Ex
shl R KB  $\Rightarrow$  C1 Ex nb
shl R 1  $\Rightarrow$  D1 24 25 *
shl R KB  $\Rightarrow$  C1 24 25 * nb
```

3.4 ror

```
ror R 1  $\Rightarrow$  D1 C(x+8)
ror R KB  $\Rightarrow$  C1 C(x+8) nb
ror P 1  $\Rightarrow$  D1 0C 25 *
ror P KB  $\Rightarrow$  C1 0C 25 * nb
```

3.5 rol

```
rol R 1  $\Rightarrow$  D1 Cx
rol R KB  $\Rightarrow$  C1 Cx nb
rol P 1  $\Rightarrow$  D1 04 25 *
rol P KB  $\Rightarrow$  C1 04 25 * nb
```

4 Bitwise Logic

4.1 not

```
not R  $\Rightarrow$  F7 Dx
not P  $\Rightarrow$  F7 14 25 *
```

4.2 or

4.2.1 register

```
or R R  $\Rightarrow$  09 sr
or R KB  $\Rightarrow$  83 C(x+8) nb
or rax K  $\Rightarrow$  0D n
or R K  $\Rightarrow$  81 C(x+8) n
or R P  $\Rightarrow$  09 pr 25 *
```

4.2.2 pointer

```
or P R  $\Rightarrow$  0B pr 25 *
or P KB  $\Rightarrow$  83 0C 25 * nb
or P K  $\Rightarrow$  81 0C 25 * n
```

4.3 xor

4.3.1 register

```
xor R R  $\Rightarrow$  31 sr
xor R KB  $\Rightarrow$  83 Fx nb
xor rax K  $\Rightarrow$  35 n
xor R K  $\Rightarrow$  81 Fx n
xor R P  $\Rightarrow$  33 pr 25 *
```

4.3.2 pointer

```
xor P R  $\Rightarrow$  31 pr 25 *
xor P KB  $\Rightarrow$  83 34 25 * nb
xor P K  $\Rightarrow$  81 34 25 * n
```

4.4 and

4.4.1 register

```
and R R  $\Rightarrow$  21 sr
and R KB  $\Rightarrow$  83 Ex nb
and rax K  $\Rightarrow$  25 n
and R K  $\Rightarrow$  81 Ex n
and R P  $\Rightarrow$  23 pr *
```

4.4.2 pointer

```
and P R  $\Rightarrow$  21 pr 25 *
and P KB  $\Rightarrow$  83 24 25 * nb
and P K  $\Rightarrow$  81 24 25 * n
```

4.5 test

4.5.1 register

```
test R R  $\Rightarrow$  85 sr
test rax K  $\Rightarrow$  A9 n
test R K  $\Rightarrow$  F7 Cx n
test R P  $\Rightarrow$  85 pr 25 *
```

4.5.2 pointer

```
test P R  $\Rightarrow$  85 pr 25 *
test P K  $\Rightarrow$  F7 04 25 * n
```

5 jmp

5.1 byte-length

jns KB \Rightarrow 79 nb

jnz KB \Rightarrow 75 nb

jmp KB \Rightarrow EB nb

6 Miscellaneous

Always 32-bits (dword) (meaning no size code).

nop \Rightarrow 90

syscall \Rightarrow 0F 05
